"PLEASE MAY I COME IN?"

Don't forget in your giving, that you are helping every sick child in Ontario whose parents cannot afford to pay—for such children are Treated Free.

THE STRONG HANDS OF YOUR OWN CHILDREN ARE
STRETCHED OUT FOR GIFTS AT CHRISTMAS, AND ALL
THROUGH THE YEAR THE STRICKEN HANDS OF THE
HOSPITAL'S CHILDREN ARE STRETCHED OUT FOR HELP

Please remit your Donation to J. Ross Robertson, Chairman of the Board,
or to Douglas Davidson, Sec.-Treas., College St., Toronto.

SPECIAL TO READERS - Please note this report is perforated, so that leaves can be separated and distributed to Public and Sabbath School Children.

PUT YOUR MONEY IN THE STEEPLE OF THE HOSPITAL'S
MERCY AND LET IT RING THE CHRISTMAS BELLS
OF HOPE IN THE LIFE OF EVERY
SUFFERING CHILD

A BUNCH IN THE BABY WARD.

"I'M AT MY SUPPER—IT'S GOOD."

THERE WERE 397 LITTLE ONES UNDER THREE YEARS OF
AGE IN THE HOSPITAL DURING 1911.

Charity for suffering ones opens in each heart a little Heaven---so will you
just think it over---Lighten your Purse and Brighten Little Lives.

Another Bright Lot from the Baby Ward.

THE HOSPITAL HAS NURSED EIGHT THOUSAND UNDER THREE
YEARS OF AGE IN THIRTY-SIX YEARS—AND SAVED
THE LIVES OF SIXTY PER CENT.

CONSECRATE YOUR BOUNTY TO THE CHILDREN.
JUST FINISH THE OLD YEAR AND COMMENCE
THE NEW WITH A GOOD AND GENEROUS GIFT.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas
Davidson, Sec-Treas., College Street, Toronto.

Heart Strings and Purse Strings—The Hospital seeks to touch the first that it may loosen the second, for the Hospital can only help the Little Ones with Mercy as you help the Hospital with Money.

THE HOSPITAL FOR SICK CHILDREN

A YEAR OF WORK IN STORY FORM

THE RECORD OF 1911

Thirty-six years of constant attention and careful management enables the Trustees of to-day to say to the people of Ontario that in this year of grace, the record of work places the Hospital for Sick Children in Toronto in the forefront with the great hospitals of its kind in the world.

No hospital ever had more humble beginnings, and few have had, in the first twenty years of existence a harder financial road to travel than this House of Good Hope that to-day in its beds and cots cares for the sick little ones of this province of Ontario.

Good words gladden many a heart, and thousands of parents—the fathers and mothers of Ontario—have many a time and oft rejoiced in heart as the good words, of little lives saved, have come to them from the great red pile in College street.

The story of what has been done by the Hospital in the last three decades in saving the child life cannot be told in a few paragraphs.

The diary of its daily work, the human interest that surrounds every bed and cot, the joy that comes to anxious mothers after almost the last ray of hope has vanished, the sorrow that crushes hearts after the hand of the Hospital has failed—pen all these, and they would read like storiettes—little booklets that surely would win kindly words and—what is better—the money that can plant Lamps of Hope along the dark road of some child's suffering, the lonely way of some mother's sorrow.

AN INTERESTING COMPARISON.

Here is a palatable paragraph in tabloid form—a few figures—will tell the whole story. Thirty-six years ago, in 1875, the Hospital in its first home in Avenue street, had six cots with one nurse, 44 in- and 67 out-patients, 111 in all. At the close of September, 1911, it had in its fifth and present home 190 cots with 1,239 in- and 14,903 out-patients, and 64 nurses.

The receipts for 1875 were \$1,700, and expenditure about the same, while for 1911 the receipts totalled \$82,820, and the expenditure \$93,942. Comparisons are sometimes not welcome, but in this case they are as welcome as an old friend.

THE FIRST INCIDENT IN HOSPITAL LIFE.

It is a far cry from that wild March morning in 1875, when the door of the Hospital swung open to welcome its first patient. A fond mother in St. John's Ward had rushed to the Hospital with her three-year-old "Maggie," an active youngster, who in her gymnastic exercises around the kitchen floor had managed to tumble into a tub of boiling water.

This tiny tot of the gentler sex was the first patient to occupy one of the six cots in the one ward that comprised the equipment of the Hospital.

This was the beginning of the Hospital work. It was a good beginning—for the child's life was saved. "Maggie" now lives in the west, has youngsters of her own, and declares that one experience of the kind is enough for herself and household for all time to come.

And so the work has progressed year after year, and the end of progress is not yet.

The Hospital management is alive to every suggestion that will improve the usefulness of the institution. There is nothing in modern surgery or medicine that is not known to its staff of surgeons and physicians. There is no instrument required by the surgeon or no medicine called for by the physician that is not on hand either in the instrument room or the drug shop of the in-

stitution. There is no appliance for crippled children that cannot be made in the mechanical department.

There is no method in the science of modern nursing that is not within the ken of the Superintendent and her assistants, and there is no better system devised for the business end of a hospital's work, than that in vogue in the Secretary-Treasurer's department, where every dollar paid in or paid out finds its place in its particular book of record.

In fact, as Dr. Bruce Smith, the chief inspector of Hospitals and Charities for the Province of Ontario, who is generally stiff in his opinions, and always in the right, said in one of his official visits, "This Hospital is as up-to-date and as perfect as the purse of man can make it in its entire equipment."

And so with this testimony of good work accomplished, the Trustees ask not only you as a donor of last year, but also other people who may happen across this report or perchance see something from it in the newspapers of the province, to help this great charity in its time of need, for a deficit of twenty-five thousand dollars faced the Hospital at the close of its financial year in September.

POINTS WORTH REMEMBERING.

Just remember as you are drawing upon your purse strings, that outside of provincial and Toronto municipal aid, the Hospital has to depend for support upon voluntary subscriptions.

Think of the work that has been done. Think of what has yet to be done.

Think of your own children at home and then of the bed-bound sufferers in our beds and cots.

Surely you will send a dollar on an errand of mercy. Your share is just what you can spare.

Recollect that the field of labor covered by the Hospital includes not only Toronto, but all Ontario, and note that the Hospital is free to every sick little child in Ontario, irrespective of race, creed or color, whose parents cannot afford to pay.

THE STEADY GROWTH 1875-1911.

The growth of the work of the Hospital has been phenomenal. It is doubtful if there is any hospital in the world that can show the array of facts and figures printed in this report.

A leading British physician who had the opportunity of reading our statistical tables a few weeks ago, said as he handed back the sheet to the Secretary, "I'm amazed. It's almost unbelievable, but it must be true. I've just been through your building. My, you are doing a great and good work."

Since the founding of the Hospital in 1875, thirty-six years ago, it has admitted within its walls 18,076 In-patients, and 115,862 Out-patients; a total number of 133,938, or an average of 3,720 per year.

Of the In-patients admitted 12,922 were from the city of Toronto, and 5,154 from other parts of the province.

Of the In-patients 9,079, or 50¼ p.c. were cured; 5,366, or 29¾ p.c. were improved; 1,400, or 7¼ p.c. were unimproved, and 1,411, or 7¼ p.c. died.

A GLANCE AT THE PAST YEAR'S WORK.

From the 1st of October, 1910, to the 30th of September, 1911, there were 1,239 children treated as In-patients, an increase of 15 as compared with 1910.

In the Out-patient department or Free Dispensary 14,903 were treated, an increase of 3,969 over 1910.

The largest number of In-patients treated in any one day in 1911 was 216; the smallest number 115; the daily average 146.

The largest number of Out-patients treated in any one day was 50; the smallest number 25; the daily average 41.

What greater charity can appeal to your heart, and what greater reward can you have than that spoken by one who touched humanity at its deepest sorrow and its keenest suffering, "Ye have done it unto me"?

THE RESULTS OF TREATMENT 1911.

Of the 1,239 In-patients treated during the year 530, or 42 $\frac{3}{4}$ p.c. were discharged cured; 369, or 29 $\frac{3}{4}$ p.c. discharged improved; 59, or 4 $\frac{3}{4}$ p.c. discharged unimproved; 139, or 11 $\frac{1}{4}$ p.c., died, and 142, or 11 $\frac{1}{2}$ p.c., remained in the Hospital.

Of the 139 deaths during the year 80 were boys and 59 girls; 9 died within two hours of admission; 17 within eight hours; 47 within seven days; 28 within two weeks, and 24 within one month; so that 90 per cent. of the 139 were practically beyond hope when admitted.

Of the 14,903 Free Dispensary, or Out-patients, the staff claim that 11,922, or 80 per cent. of those who received treatment, were cured, and at least 10 per cent. were improved.

NATIONALITY AND RELIGION OF PATIENTS.

Of the 1,239 patients admitted, 617, or 49 $\frac{3}{4}$ p.c., were from Canada; 338, or 27 $\frac{1}{4}$ p.c., from England; 30, or 2 $\frac{1}{2}$ p.c., from Ireland; 74, or 6 p.c., from Scotland; 9, or $\frac{3}{4}$ p.c., from the U. S., and the remainder, 171, or 13 $\frac{3}{4}$ p.c., from foreign countries.

Of the 1,239 admitted, 973, or 78 $\frac{1}{2}$ p.c., were Protestants; 117, or 9 $\frac{1}{2}$ p.c., Roman Catholics, and the remainder, 149, or 12 p.c., other religions.

AGE AND SEX OF PATIENTS.

Patients are received from birth up to 14 years, and of the 1,239 patients last year there were 705 boys and 534 girls. In 1910 there were 684 boys and 540 girls.

Of the 1,239, there were 185 under one year, 109 one to two, 103 two to three, 92 three to four, 62 four to five, 81 five to six, 70 six to seven, 102 seven to eight, 88 eight to nine, 65 nine to ten, 67 ten to eleven, 65 eleven to twelve, 46 twelve to thirteen, 61 thirteen to fourteen, 43 fourteen to fifteen years.

THE DAYS' STAY IN HOSPITAL OF EACH PATIENT.

The number of days of Hospital care for 1911 was 59,423. The previous year the number of days was 54,608.

The average days' stay of each patient for the year 1911 was 48. In 1910 the average was 44 $\frac{1}{2}$.

The above figure 48 is arrived at, by dividing the total number of In-patients, 1,239, into the total days' stay 59,423 of all patients in Hospital.

COST PER PATIENT PER DAY.

The cost of maintenance this year shows an increase over last year. Housekeeping required an extra \$2,000, increase in salaries \$1,500, special nurses required for scarlet fever ward \$1,000. Our wards were closed for three months, shutting out 125 patients and losing 5,000 days in time. If it were not for this outbreak the per capita would have been the same as last year.

The cost per patient per day is arrived at by adding all the days that each patient has been in the Hospital from October 1st, 1910, until September 30th, 1911—the official year—and then dividing the days into the total expenditure.

The total number of In-patients 1911 was 1,239, who were in 59,423 days, an average of 48 days each.

The cost of each patient per day was \$1.58, or \$75.84, for the 48 days' stay of each patient. The cost in 1910 was \$1.52, or \$67.44 for the 44 $\frac{1}{2}$ days' stay of each patient.

In 1911 there were 1,239 patients in the Hospital for 59,423 days, at a cost of \$93,942.27.

Of the 1,239 patients admitted last year, 837 received medical care and attention free, or 41,196 of the total number of days' service were given to free patients.

THE SURGICAL SERVICE.

The number of operations performed last year was 1,092; in the In-patient Department 517, in the Out-patient Department 575, besides many minor operations which were not recorded.

The number of operations performed in 1910 on In-patients was 518, on Out-patients 372, a total of 890.

OUT-PATIENT DEPARTMENT AND FREE DISPENSARY.

The total attendance during the past year was 14,903, an increase of 3,969 over 1910. There were 8,193 boys and 6,710 girls. The average attendance for the year was 41 per day.

Of the 14,903 cases treated, there were 2,238 eye, ear, nose and throat cases; 793 orthopedic; 8,489 medical, and 3,383 surgical cases.

In the Dispensary there were 29,950 prescriptions or orders filled, including daily solutions, ward requisites and chemicals.

THE ORTHOPEDIC DEPARTMENT.

The Hospital for Sick Children stands to-day in the front rank for the cure of joint affections, bone tuberculosis and deformities of childhood.

Of the 1,239 patients who received treatment in the institution last year, 233 were treated for deformities, paralysis, etc., including the following: 36 hip disease, 42 Pott's disease, 13 bow-legs, 9 knock-knees, 58 club-feet; 13 crooked back, 3 wry neck, 18 hip out of joint from birth, 31 paralysis, 10 tubercular disease of knee, wrist and foot.

The establishment of the shop for the manufacture of mechanical appliances needed in the treatment of deformities has proved of great advantage to the patients, and much attention especially has been paid to furnishing apparatus to poor patients at cost.

MASSAGE.

A writer has said that the mode of application of massage may be cultivated as an art second to none that the human hand can perform. Its range of usefulness is certainly increasing all the time, and has now extended into every special and general branch of medicine.

Of the 1,239 In-Patients in 1911, 406 received massage; the daily average number of patients treated being 15.

Among the many cases in which massage played a most important part in the restoration to health were patients suffering from infantile paralysis, facial paralysis, diphtheritic paralysis, stiff joints, fractures, broken arms, wrists and legs, curvature, rheumatism, rickets, diseases and injuries of muscles, joints and bones, dislocations and contractions, restlessness, sleeplessness, typhoid convalescents, St. Vitus dance, constipation.

At the Out-Patient Department the masseuse also gave treatment twice a week to patients who had been discharged, but returned weekly for this special treatment.

GYMNASIUM.

On the fifth floor of the Nurses' Residence is the gymnasium with a complete equipment.

The teacher gives daily lessons of thirty minutes in Swedish gymnastics, apparatus work and games to pupils in the preliminary course, besides swimming lessons, miscellaneous exercises and corrections to nurses in training. Also every patient in the Hospital requiring treatment receives individual attention from the instructress under the doctor's supervision.

X-RAY DEPARTMENT.

The records of the year's work show the following: 314 photographs taken, 1,462 sciagraphs made, 354 fluoroscopic examinations, 68 X-Ray treatments for different diseases, and 198 fractures reduced under the X-Ray.

Some interesting radiographs taken were: 52 Dislocations, 63 Hip Cases, 162 Bone Diseases, 350 Chest and Lung Conditions, and 115 Foreign Bodies discovered.

THE LAKESIDE HOME FOR LITTLE CHILDREN.

The summer home on Toronto Island of the Hospital for Sick Children, erected in 1882, was opened on 19th May, and closed 30th September.

Last year 343 patients were cared for, and 5,263 sick children have been benefitted during the past thirty years.

One hundred children sleep in the open on the great balconies of the Home, from the opening to the closing day. The increase in weight of the patients averages from three to five pounds.

THE SCHOOL-ROOM.

The School continues to play an important part in the care of the children.

During the year 230 patients of the Hospital attended, or an average monthly attendance of 45.

Children from the age of four to fourteen years are admitted, and the work covers the regular Public school course, starting with the kindergarten.

TRAINING SCHOOL FOR NURSES.

There are now in training 64 nurses, of whom 8 are head nurses, 15 senior, 11 intermediate, 16 junior and 14 probationers.

The present Staff consists of the Superintendent, Assistant-Superintendent, Night-Supervisor, Operating-room Nurse, Teacher of Preliminary Course, Dietitian, Gymnasium Directress, and Massage Instructress.

The number of applicants during the year was 209, of whom 60 were accepted.

During the year 41 probationers entered the School, 26 only being retained as pupil nurses; 12 nurses graduated, making a total of 238 graduates since the establishment of the School in 1886.

The following lectures were given in 1911: 26 for juniors, 20 for intermediates, 9 special lectures for seniors, 3 weekly by the Superintendent and her Assistant, and 3 lessons weekly by the Masseuse for seniors.

In the Probationary Course the following lectures were given: 2 weekly by special lecturers; daily classes and demonstrations by the teacher of probationers, daily gymnasium classes by a special teacher, and daily lessons in the Diet Kitchen.

DIETETICS IN THE HOSPITAL.

The practical operation of the Diet Kitchen has become a very material and valuable adjunct to the Hospital equipment.

The pupils during their probationary period receive the six weeks' course in the Training School Diet Kitchen, and the nurses in the Hospital prepare under the direct supervision of the Dietitian, diets for private, semi-private patients, and also all patients requiring special diet.

A marked improvement in Hospital service, therefore, has been made in the Dietary, and in the manner of serving patients' meals.

THE DISTRICT NURSE.

The district nurse visits the homes of all patients who have been discharged from the Hospital, and gives instructions to the parents.

The records of this department for the year show:—Number of patients visited, 700; number of visits, 3,657, or an average of 70 visits per week.

THE MILK SUPPLY.

The Pasteurization Plant has now been in complete working order for the past two years, all milk used being scientifically pasteurized in our Laboratory.

During the year 72 gallons of milk were daily pasteurized for in-patients and 602 bottles of baby food prepared for outside babies—a daily average of 60 babies. The milk used in the Hospital for the patients and the staff is all pasteurized.

THE CARE OF TUBERCULAR CHILDREN.

In July, 1910, a Pavilion was erected by the Chairman of the Hospital, on the grounds of The Lakeside Home for Little Children, for the treatment of children suffering from tuberculosis—this work being under the Heather Club, of this city.

Last summer the Pavilion was enlarged to nearly double the size, by the original donor, and it now accommodates 50 patients at one time. During the summer 77 patients were treated.

NEW COTS DURING THE YEAR.

The following cots have, by the payment of \$2,000, been named in perpetuity in the Hospital in College street in 1911:

"The B. Frank Bull Cot," by T. H. Bull, Toronto; "The H. H. Williams Cot," by H. H. Williams, Toronto; "The A. E. Kemp Cot," by the Hon. A. E. Kemp, Toronto; "The Margaret Baldwin Cot," by Miss Bessie M. Baldwin, Toronto.

The following cots, by the payment of \$100 per year, were named to be maintained annually in the Hospital in College street:

"The Jean Evelyn Boeckh Cot," by Mrs. E. C. Boeckh, Toronto; "The Robert Henry Knowlton Cot," by W. H. Knowlton, Toronto; "The Gold and Dross Cot," by "Toronto Saturday Night"; "The Walter Cot," by Mrs. D. H. Lockhart Gordon, Toronto; "The Massey-Harris Cot," by the Massey-Harris Company, Toronto; "The Hannah Walker Cot," by T. L. Walker, Toronto.

The following cot has, by the payment of \$500, been named in perpetuity at The Lakeside Home, Toronto Island: "Mother's Cot," by Mr. and Mrs. Alexander McCredie, Chippewa, Ontario.

The following cots, by a payment of \$25 a year, were named to be maintained annually at The Lakeside Home, Toronto Island:

"The Mary Scrace Cot," by Wm. G. Scrace, Toronto; "The Herbert Norris Cot," by J. W. Hunter, Toronto; "The Beechwood Cot," by Public School Children of Beechwood; "The Hope Cot," by Bible Classes of Methodist S. S., Brownsville, Ontario.

BEQUESTS IN THE YEAR.

The Trustees beg to acknowledge with thanks the following bequests from the estates of:

Henry James, Brantford, \$250; Dr. Andrew Smith, Toronto, \$1,000; Charles Cockshutt, Toronto, \$10,000; G. W. Lewis, Toronto, \$175; Joseph Madill, Creemore, \$500; James Logie, Speyside, \$100; Annie McKenna, London, \$50; Jane Shields, Toronto, \$5,000; William Warren, Montreal, \$300; R. J. Doyle, Owen Sound, \$10; E. A. Foster, Toronto, \$800; Robert Armstrong, Bowmanville, \$138; Henry Woods, Aylmer, \$250; Mary Hoey, Thornbury, \$20; R. R. Newborn, New Toronto, \$7,387.50; W. E. H. Massey, Toronto, \$13,200; B. F. Brook, Listowel, \$100; Thomas Bickerstaff, Toronto, \$55.40; Henry Johnson, Consecon, \$2,810; George H. Griffin, Sarnia, \$100; Mrs. Nellie Beatty, Winnipeg, Man., \$200; Wm. McTaggart, Toronto, \$1,000; Mrs. Sarah Grace Allworth, Toronto, \$100; Mrs. E. M. L. Jackson, Tilbury, \$100; A. D. Smith, Unionville, \$500.

THE MASSEY BEQUEST.

The munificent donation from the estate of the late W. E. H. Massey is most gratefully acknowledged. This magnificent gift is one more of the noble series that associate the name of the Massey family with the unfailing glory of goodness to the Hospital; goodness whose benefits cannot be told in words any more than the gratitude of the Trustees can be expressed in language.

When you make your Will, please use this form:—"I give, devise and bequeath to The Hospital for Sick Children, Toronto, the sum of \$——."

The incorporated name of the Hospital is "The Hospital for Sick Children, Toronto."

THE CLINICAL AND RESEARCH LABORATORY.

The Bacteriological, Clinical, Microscopical and Research work has been carried on with great interest during 1911.

The records show the following:—Bacteriological Examinations, 2,175; Blood Examinations, 925; Urinalyses, 1,690; Milk Examinations, 700; Lumbar Punctures, 15; Autopsies, 43; Pathological Specimens from Surgical Services, 7.

RECEIPTS AND EXPENDITURES.

The receipts on maintenance account were \$82,820, and the expenditure on the same account \$93,942, an increase in receipts of \$5,371, and in expenditure of \$10,993. The increase in expenditure is due to the increased cost of everything in the housekeeping line—staple articles of food and higher wages that must be paid to secure proper help. The charges on capital account were \$16,000, which includes the complete repainting inside and outside of the Hospital and The Nurses' Residence, and also electric re-wiring of the Hospital and wire screening The Lakeside Home. This charge was met in part by a special donation to the Hospital of \$10,000. This year of all the years the Hospital has been up against increased cost of maintenance in every department. The epidemic of scarlet fever, the closing of the wards for three months, depleted the revenue by about \$2,500, with another \$1,000 loss on pay patients that had to be refused admission. These outbreaks of scarlet fever and diphtheria have cost the Hospital \$30,000 during the last thirty-six years.

HAVE YOU A SPARE DOLLAR ?

Won't you help us to make this response the largest we have ever had?

We want new donors to fill the gaps in our lists, made by death, removal and other causes.

The maintenance fund must be replenished, for without it the Hospital must close its doors. The machinery you provide is useless if you stint the fuel to run it. The fuel is to an engine what the maintenance fund is to a hospital.

May the spirit of Him who made the lame to walk and the blind to see, enlarge your heart and increase your giving to the sacred cause of suffering childhood.

"The Angel of His Presence Saved Them," and, reverently be it said, the angel of your money can save many a little life.

Every day is Christmas to the child whose little life is saved or whose crippled limb is straightened with the might of your money and the mercy of the hospital.

Let your money help the Hospital spread the rainbow of its mercy across the storm-swept sky of some child's life.

With your mercy as a torch, the Hospital can light candles of health on the Christmas tree of some child's life.

Put your money in the steeple of the Hospital's mercy, and let it ring the Christmas bells of hope in the life of every suffering child.

This is our appeal.

For the Trust,

J. ROSS ROBERTSON,

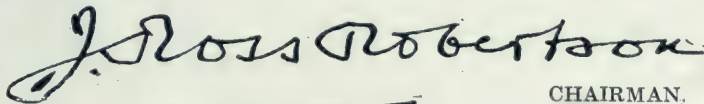

E. B. OSLER,

GEORGE A. COX,

JOHN FLETT,

J. STRACHAN JOHNSTON

Trustees. }

CHAIRMAN.

He prayeth best who loveth best
All things both great and small

**AND THE LOVE THAT GIVES MONEY TO THE HOSPITAL LENDS
HOPE TO THE MOTHER AND HEALTH TO THE CHILD.
SUCH LOVE IS A NOBLE FORM OF PRAYER.**

The Pavilion at the Lakeside Home

This building is on the grounds of the Hospital's Summer Home and under the management of The Heather Club. It accomodates 50 patients and during the summer 77 were treated. The results were wonderful.

Dietetics in the Hospital

The Diet Kitchen is in the Residence for Nurses. It is an important asset in the Hospital equipment. Every nurse has a six weeks' course in diets for every kind of patient. Earl Grey, who frequently visited the Hospital, had luncheon prepared by the class and enjoyed it. He said, "It's excellent cooking—why it's as good as the Savoy in London."

**THE HOSPITAL WAS THE FIRST IN THE DOMINION TO EQUIP
A DIET KITCHEN.**

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

THE HOSPITAL FOR SICK CHILDREN, TORONTO.

AUDITORS' REPORT, HOSPITAL FOR SICK CHILDREN.

To the Chairman of the Trust—Dear Sir,—We beg to certify that the Receipts and Disbursements of the Hospital for Sick Children have been carefully audited with the vouchers and bank account throughout the year ending Sept. 30, 1911, and the accompanying statements of Income and Expenditure and of Assets and Liabilities bearing our signature are a true and correct account of the affairs of the Hospital to that date. The books and work of the office are well looked after, and all desired information has been freely given. Respectfully submitted,

Toronto, Oct. 9, 1911.

A. C. NEFF & CO., Chartered Accountants.

REMEMBER THE SICK CHILDREN IN YOUR WILL.

Look at other pages of this report and read the names of those who have memorial cots. \$2,000 names and maintains a cot in perpetuity. If you cannot found a cot—leave something—if only a hundred dollars—to help to nurse sick little ones. The form to use is:—"I Give, Devise, and Bequeath to The Hospital for Sick Children, Toronto," the sum of \$.....

The Incorporated name is "The Hospital for Sick Children, Toronto."

Your money can help the Hospital smooth the brow of pain, cool the fevered lips and straighten the crippled limbs of little children.

A Group of Our Nurses

This is a photo of nine of the sixty-four faithful women in our Training School. The photo man said, "I don't want to crowd the picture. I can only do justice to nine."

A Scene in the Boys' Surgical

There were 1,092 surgical operations—scores from accident—every kind of accident—so many that they are "Too numerous to mention here."

Heart Throbs put tears in your own eyes, but Pocket Throbs put \$ \$ \$
\$ \$ \$ \$ in the Hospital's hand—the mighty hand of help
and healing for suffering little children.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto,

COTS NAMED AND MAINTAINED IN PERPETUITY IN THE HOSPITAL FOR SICK CHILDREN.

This record of especially the last twenty-one years shows that the objection parents have had to sending their sick little ones to the Hospital has been largely overcome.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec. Treas., College Street, Toronto.

PURE MILK MEANS LIFE FOR THE BABIES

THE MILK LABORATORY

Pasteurizing the Milk.

All milk used is scientifically pasteurized. For In-Patients 72 gallons daily. For outside babies 602 bottles of baby food and modified mixtures. Daily average 80 babies. Hundreds of babies—many dying because they could not digest food—improved and saved by pasteurized milk. One mother of a score said: "I could never have reared my baby, but for your good milk." Another: "You saved the life of my baby." Another: "Your milk has done wonders for my little boy." Hundreds of mothers say the same thing.

ISN'T IT WORTH THE DIFFERENCE ?

—Think of What Your Dollar Will Do—

It helps to restore health and strength --To give sound limbs and straight feet to Crippled Boys and Girls.

SEE WHAT THE SURGEON HAS DONE

Four Cases Out of Fifty-eight Last Year Perfect Results

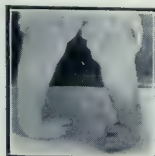

BEFORE

BEFORE

BEFORE

BEFORE

A RECORD YEAR

There were 233 cases treated for deformity last year.

Fifty-eight were club feet, all of which were corrected.

Thirteen bow-legs — a lucky number this time—for all were straightened.

Nine had knock-knees, but the surgeon has knocked all the knocking out.

Look at these pictures of crippled children, who entered the Hospital handicapped with club and crippled feet, and were sent home corrected.

In thirty-six years seven hundred crippled children have been corrected. There is no greater record of such work in the world.

SURGICAL OPERATIONS.

TABLE SHOWING NATURE OF SURGICAL OPERATIONS DURING THE YEAR FROM OCTOBER 1ST, 1910, TO SEPTEMBER 30TH, 1911.

OPERATIONS	Total	OPERATIONS	Total
Opening abdomen for removal of appendix	33	Miscellaneous—	
Draining appendiceal abscess	2	For abscess of chest	5
Telescopy of bowel	4	Removing needle	1
Drainage of abdomen	2	Dressing burn	1
Exploration	1	Skin grafting	1
Opening stomach	1	Stitching wound	1
Plastic Operations on—		Excision of scar	1
Hare-lip	22	Excision of growth	3
Cleft palate	19	Freezing birthmark	1
Face	1	Excision of birthmark	1
Finger	2	For thick neck	1
Hand	2	Cauterization of rectal prolapse	1
Arm	1	Examination under anaesthesia	7
Hymen	2	Nose, Throat and Ear—	
Wound	2	Operation for mastoiditis	21
Operations on Bones—		Removal of tonsils and adenoids	3
Removing small bone of ankle	14	“ posterior hypertrophy	4
Breaking bones of legs	22	Plastic operation for deflected septum	4
Scraping	29	Evacuation of abscess of ear	1
Removing dead bone	5	“ pharyngeal abscess	1
Draining abscess	4	Removal of tumor of Larynx	1
Elevating depressed fracture of skull	2	Foreign body in nose	1
Making window in skull	3	Dilatation of oesophageal stricture	22
Reducing fracture	29	Evacuation of Abscess—	
Plating a fracture	1	Simple	29
Reduction of Dislocation—		Tubercular	25
Simple	1	Removal of glands	25
Congenital hip	12	Tenotomy and plaster	31
Drainage of joint	6	Manipulation and plaster	18
Excision of joint	1	Tenotomy of sterno-mastoid	3
Making new joint	1	Tendon transplantation	2
Amputations—		Evacuation of cyst of eyelid	1
Finger	2	Evisceration of eyeball	1
Toe	1	Enucleation of eyeball	4
Leg	3	Needling cataract	1
Operations—		Removal of tear sac	1
For rupture	44	Iridectomy	1
Draining hydrocele	1	Plastic operation on eyelid	2
Orchidectomy	1	Operation for squint	10
Orchidopexy	2		
Circumcision	3	Total	517

SURGICAL OPERATIONS IN OUT-PATIENT DEPARTMENT.

Removal of tonsils and adenoids	381	Removing growth from lip	1
“ Adenoids	74	Stitching cut tongue	1
“ Tonsils	2	Removing sliver from finger	2

Christmas Kindness Weeps Dollars Over the Woes of the Children, and Such Tears are for the Healing of the Helpless

THE BABY WARD—THE POPULAR WARD

A Quartette of Three-Year-Olds

Little patients enter sad and worn and depart bright and healthful. Now you see our work—you know our hopes—will you help us in our appeal?—397 under three years old in last year.

**"TRY TO LOOK NICE FOR THE PHOTO
MAN, HE'LL TAKE YOUR PICTURE."**

**FOUR NURSES AND FOUR TINY TOTS—ALL
MALNUTRITION CASES IN THE BABY WARD.**

The dollars of the kind in heart
Are wings of truest prayer;
The children need you—do your part—
Our deeds of mercy share.

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

THE HOSPITAL'S CRY IS NOT FOR ITSELF BUT FOR
THE CHILDREN AND YOUR DOLLARS GO NOT
TO THE HOSPITAL BUT TO THE CHILDREN

THE GIRLS' SURGICAL WARD.

Visitors' Day is the Great Day.

There is only one visiting day at the Hospital and that is Sunday, from 2-4. The visitors include fathers and mothers and friends—average about 200. It is a day of joy for the patients, but as the hour of "Good-bye" comes, many of the youngsters have a five minutes' cry as their parents leave the wards. But in less than ten minutes peace reigns and the youngsters are quiet and happy.

A Mixed Lot—Boys and Girls.

It was rather a hard proposition for the photo man to get this group in "perfect repose," and then the repose only lasted about thirty seconds. They are all convalescent and are a lively lot.

Health and Wealth—you give Wealth to the Hospital and the
Hospital gives Health to the Children

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

Will You Put a Shot of Cash Into the Soft Quartz of the Hospital's Mercy and Uncover the Native Gold of Help for the Little Children

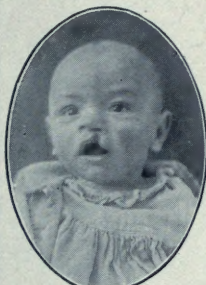

REMEMBER EVERY LITTLE HELPS—YOUR SHARE
IN THE GIVING IS JUST WHAT YOU CAN GIVE.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

Your Money Can Put Golden Hinges on the Door of the Hospital's Mercy.

The Marvels of Modern Surgery!

SOME EXAMPLES OF HARE-LIP ALL CORRECTED.

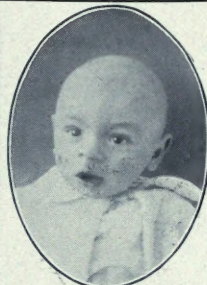

BEFORE

Just Look at These Pictures.

Is there any example of surgical work in this report that can better exemplify the value of the Hospital to the deformed children of this province?

In every case these children were of poor parents, unable to pay for treatment. These little ones would have been handicapped for life were it not for the opportunity offered by this Hospital.

AFTER

BEFORE

There have been 273 cases in the Hospital in 36 years; 201 of the cases were discharged—all corrected—perfect results.

This work is what your dollar helps to do. Your money goes right to the proper spot. You help us to keep open the Hospital where this work is done.

AFTER

BEFORE

Two years ago three mothers at first refused to take their children, who were in for hare-lip, out of the Hospital. The corrections were so perfect, and had so changed the faces of the babies that the mothers could not—for the first five minutes—recognize them. One mother said that we were trying to palm off on her another child that never had hare-lip. But after another good look, the mothers, with tears of joy, took their babies; and all that the nurse heard as they left the corridor was: "God bless the Hospital."

**CANNOT YOU SPARE JUST
A DOLLAR?**

AFTER

Every Dollar is a Plank Under the Little Feet of
Children who Cross the Hospital's Bridge of
Mercy over the Gulf of Death.

THE HOSPITAL'S SUMMER HOME

The Lakeside Home for Little Children, Lighthouse Point, Toronto Island.

From May until October 343 patients were nursed in this paradise for sick children. Daily average 130. Average increase in weight four to five pounds. 5,263 patients have spent happy summers in the Island Home since 1882.

A Happy Group on the Six-acre Lawn of The Lakeside Home.

Must the children die while the mothers cry
For the aid your purse can lend?
Oh, the need grows great as the days go by,
Won't you be the children's friend?

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.
